

Jane Smith

DevOps & Cloud Solutions Architect

Email: jane.smith@email.com | Phone: (555) 987-6543 | Location: San Francisco, CA

Professional Summary

Distinguished Cloud Systems Architect and DevOps Specialist with 12+ years of hands-on experience designing cloud infrastructure and deployment automations. Expertise in container orchestration (Kubernetes), infrastructure as code (Terraform), and cloud deployments (AWS, GCP). Highly proficient in scripting with Python and Bash.

Core Technical Skills

- | | | |
|-------------|--------------|-----------|
| • AWS | • Kubernetes | • Docker |
| • Terraform | • CI/CD | • Python |
| • GCP | • Prometheus | • Grafana |
| • Linux | • Bash | • Jenkins |

Work Experience

Principal DevOps Engineer at Global Cloud Systems (2020 - Present)

- Architected and deployed multi-region Kubernetes clusters (EKS) hosting 150+ microservices securely.
- Created infrastructure deployment automations in Terraform, reducing resource provisioning time from days to minutes.
- Established strict DevSecOps protocols incorporating container vulnerability scans, ensuring HIPAA compliance.
- Optimized cloud infrastructure spending, saving the organization \$300,000 annually in AWS computing charges.

Senior Cloud Infrastructure Engineer at Platform Innovators (2015 - 2020)

- Managed AWS and GCP cloud architectures featuring high availability, autoscaling, and secure VPC tunnels.
- Built comprehensive centralized logging and monitor metrics systems using Prometheus, Grafana, and ELK Stack.
- Created modular python scripting suites to automate system backup routines and automated disaster recovery tests.

Education

Bachelor of Science in Computer Engineering - UC Berkeley (Graduated 2014)
